NOVA PRO DRAWER SYSTEM

The complete drawer system sets standards
in modern furniture-making.

NOVA PRO THE ORIGINAL. REINVENTED TIME AND TIME AGAIN.

Only a movement system that is subject to constant further development can serve as a source of inspiration for the interior design of the future.

For this reason the track-proven Nova Pro drawer system is always good for a surprise - with individuality, intelligent technology and compelling design.

There are things
you simply can't do
any better.

This is because they have been carefully thought through from the outset. Just like Nova Pro. Two-double wall drawer sides with two designs, a range of colours, as a drawer or pot drawer with variable add-on systems offer almost unlimited design options.

Nova Pro is synonymous with functional beauty. This complete system is the expression of our never-ending passion for perfect movement system solutions.

Movement is perfect harmony.

Nova Pro keeps moving a whole life long.

We admit that we are proud of Nova Pro. This drawer system features fully synchronised slide technology without a mid-way knock – a first in furniture design. Today the soft-flowing and perfectly smooth movement is already the norm that no-one wants to do without. The excellent running characteristics of Nova Pro have become a distinctive feature of high-quality furniture.

Durability, power and strength are among the outstanding features of Nova Pro.

There are many reasons why Nova Pro is more contemporary than ever before. One is the special functionality of the drawer system. With its load capacity and of up to 70 kg plus minimum drawer deflection throughout the entire range, the welded drawer sides ensure maximum stability in every drawer width and depth.

The two design shapes Nova Pro Classic and Nova Pro Deluxe also create scope for virtually limitless design ideas – particularly in combination with the Crystal add-on version.

Nova Pro Deluxe.

With gently
curved surfaces.

Harmony of form and function.

With its elegant and discreet expression of form, the Deluxe drawer side wins the hearts of modern individualists. Its aesthetic expression of form blends harmoniously into sophisticated design concepts. Its optimum use of space has helped to make Nova Pro Deluxe indispensable for high-quality furniture-making.

Those with an eye for quality
will recognise it at first glance.

**The logo stamped on the Nova Pro Deluxe
and Nova Pro Crystal Deluxe acts as a visible
indication of their unsurpassed quality.**

High-quality craftsmanship, material quality and sophisticated design can be recognised at first glance on the smooth, metallic surface. The Nova Pro Deluxe and Nova Pro Crystal Deluxe drawer sides are stamped with the GRASS logo. Your logo can also be incorporated upon request.

Nova Pro Crystal.

Transparent systematics
from the outside in.

Consistency is one of the most outstanding properties of the Nova Pro range.

The design quality continues in the drawer interior. The glass add-on system for Nova Pro Deluxe offers stylish insights and provides scope for exciting material contrasts and surprising highlights.

NOVA PRO DRAWER SYSTEM

Nova Pro Classic. With a streamlined design.

Extra space with a perfect style.

The torsion-free double-walled drawer sides stand out with their distinctive welded profile. The inner values are, however, equally important. With straight inside surfaces at an exact angle of 90° and a low construction width, the Nova Pro only needs minimum space to provide maximum storage.

Nova Pro railing systems.

High level of stability and consistent design.

Both round and rectangular railing system styles are a harmonious addition to the Nova Pro Deluxe and Classic drawer sides.

Modern kitchen design often combines high fronts with low drawer sides. Optimal stability of these pot drawers is achieved with either the round or the rectangular railing in the Nova Pro range. With their slender, elegant design, they can be used for individual solutions. Cross-dividers provide additional support for all storage items.

Comfort is a question of technology.

Soft-close – the integrated damping system sets the standard.

With Soft-close, the comprehensive damping concept by GRASS, each movement becomes an experience. Because closing drawers with Soft-close is something special. Soft-close gently slows the closing action of the drawer and silently pulls it to the fully closed position. It is no surprise, therefore, that Soft-close has become the benchmark.

Movement comfort at the highest level: GRASS opening systems for furniture without handles.

Contemporary furniture is typified by large, smooth surfaces and puristic elegance. In keeping with this trend, Nova Pro offers two innovative opening systems: Tipmatic Soft-close and Sensomatic.

Tipmatic Soft-close combines the advantages of mechanical opening with the comfort of the reliable Soft-close damping system and with the adjustable, three-stage opening force ensures elegant movement, irrespective of the weight and size of the furniture fronts.

Sensomatic, the new electro-mechanical opening system, combines the advantages of handle-free opening with the elegance of damped closing.

Compelling. The Nova Pro full-extension drawer.

All the features of the Nova Pro drawer system at a glance:

- **High-quality:** Synchronised full-extension drawer system for regular and pot drawers with maximum lateral stability due to the welded profile.
- **Functional:** Excellent running characteristics and minimum drawer deflection.
- **Convenient:** The angle adjustment facility for the front is integrated into the drawer side.
- **Strong:** Load capacities of 40 kg and 70 kg with low opening pull forces.
- **Adaptable:** The 3-dimensional front adjustment ensures perfect reveals.
- **Variable:** 3 different heights in several colours as a regular or pot drawer with railing, Duowing or Crystal add-on system.
- **Space saving:** More storage space with the 90° inside surfaces and the low opening pull forces.
- **Comfortable:** The integrated Soft-close damping ensures gentle closure.

NOVA PRO

The complete drawer system combines functionality and design to achieve an unsurpassed movement standard.
